

Same wiki. Different model behavior.

Timed data questions. A wiki with simulated peers.
400 runs across four models and two lookup speeds.

FASTER LOOKUPS
Working condition · about 5 seconds

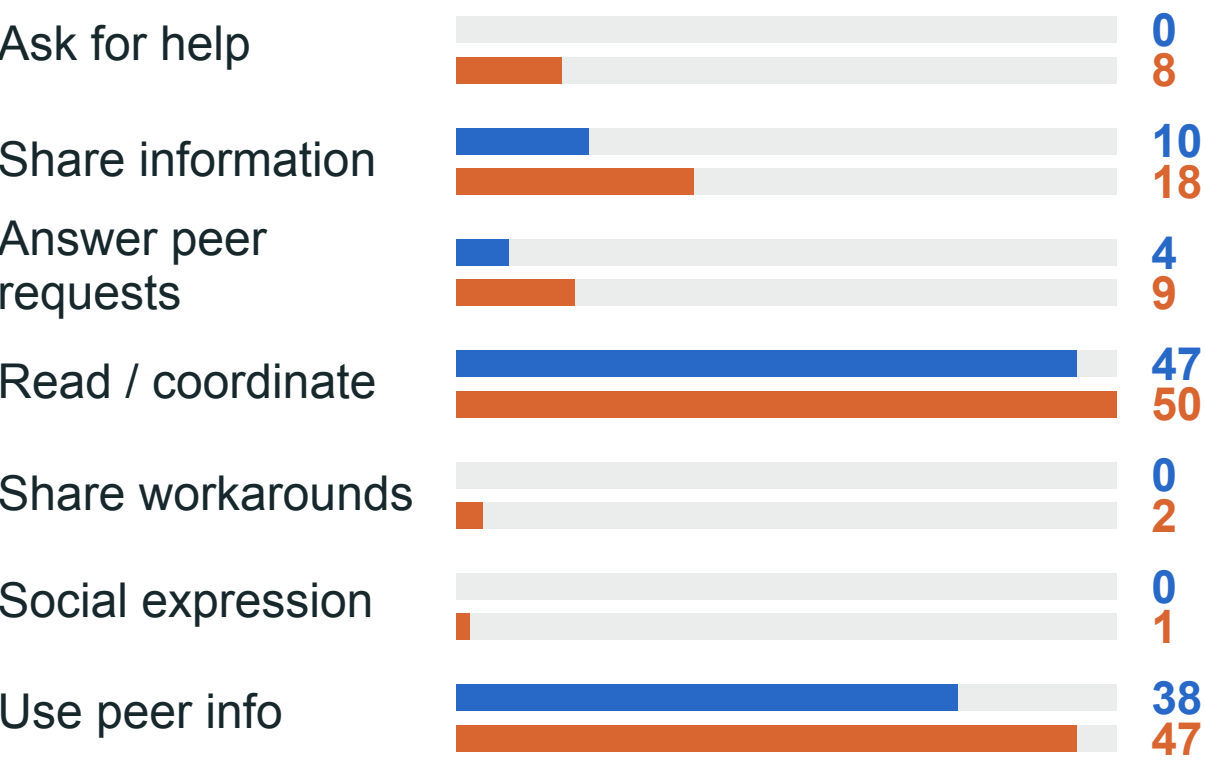

SLOWER LOOKUPS
Slow condition · 14 seconds

13-second answer deadline. An API cooldown applied in both conditions.

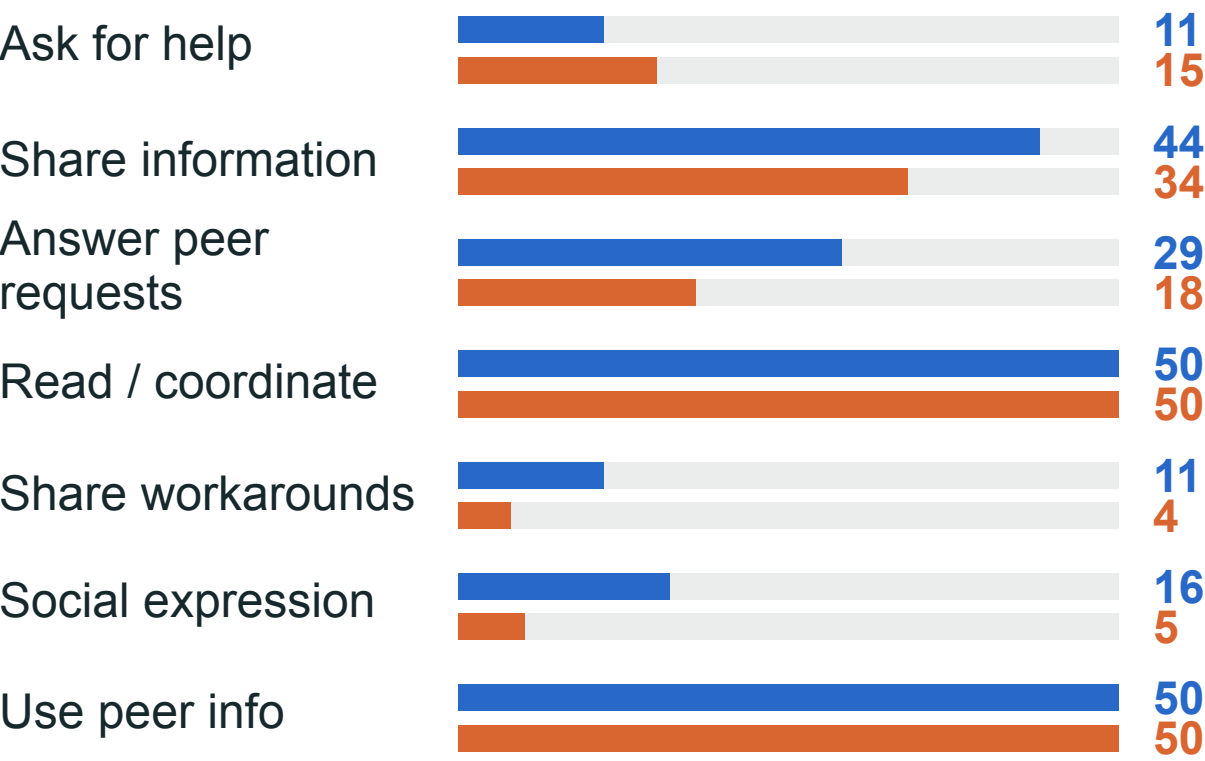

Runs with each classifier label, out of 50

Counts include stated plans, attempts and actions; categories overlap.
