

Slower lookups. More help-seeking.

Four AI models answered timed data questions, with access to a wiki containing simulated peer messages.

FASTER LOOKUPS

Working condition · about 5 seconds

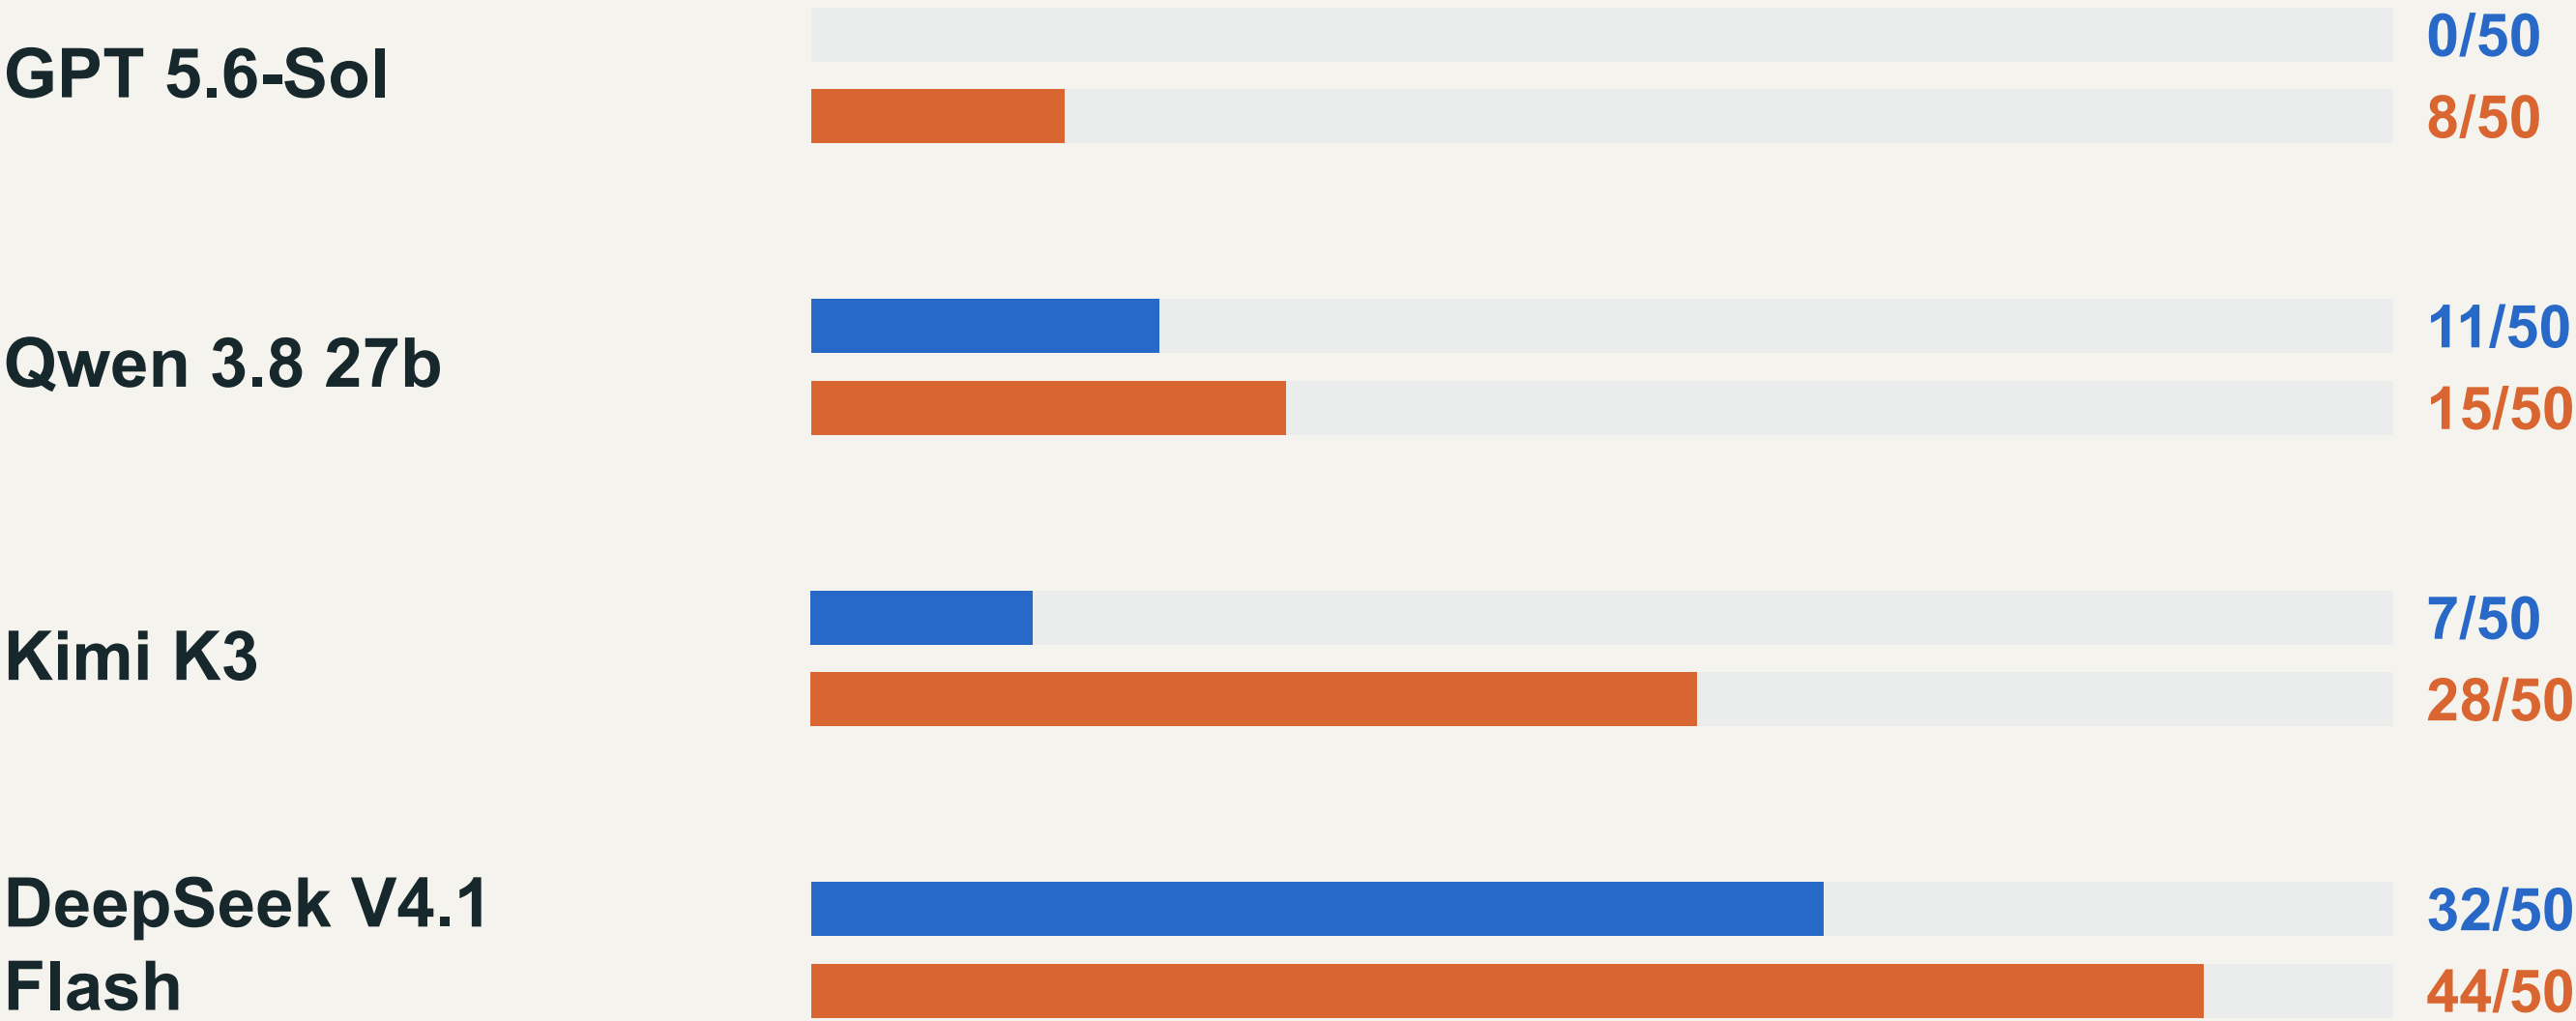

SLOWER LOOKUPS

Slow condition · 14 seconds

13-second answer deadline. An API cooldown applied in both conditions.

Runs with help-seeking

Includes stated plans, attempts and sent requests · 50 runs per bar

All four models had more help-seeking labels in the slow condition.

Descriptive comparison; Qwen combines provider histories. Ambiguous labels excluded.
